The Mining Company

The Rajgamar coal mine is a network of coal mines consisting of Rajgamar Underground mine, Rajgamar Dipside (Deavnara) mine and Rajgamar Dipside (South of Phulakdih Nala). Rajgamar underground mine, currently operational, is operated by South Eastern Coalfields Limited, a subsidiary of Coal India, producing 0.45 million tonnes per annum, on a mining lease area of 3486.577 hectares in Korba, State Chhattisgarh, India.

Rajgamar Dipside (Deavnara) underground Coal Mine was previously allocated to M/s Deavnara Coalfields Pvt. Ltd. a joint venture company of API Ispat &Power tech Pvt. Ltd., New Delhi and C.G. Sponge Manufacturers Consortium Coalfield Pvt. Ltd., Raipur, Chhattisgarh for their captive use but was deallocated by the Supreme Court in 2014 as part of a broader move to reform coal block allocations. Reintroduced under India's transparent and competitive auction regime, the block now finds a new future with TMC.

Ministry of Coal Successfully Launches the 13th Round of Commercial Coal Mine Auctions

Shri Reddy also talked about the holistic approach in coal mining involving the community development and welfare of the local public

By Industrial Punch - 21 August 2025

The Rajgamar Dipside (Deavnara) coal block, covering nearly 730 hectares, is situated in the resource-rich Korba Coalfield of Chhattisgarh's Korba district, one of India's most significant coal-producing belts. Geographically, the block is surrounded by dense forest tracts, industrial hubs, and well-developed transport corridors, ensuring strong connectivity. Holding 78.46 MT of G8 grade reserves, the block has a Peak Rated Capacity (PRC) of 1.0 million tonnes annually..

TMC FIRST COAL MINE RAJGAMAR DIPSIDE (DEAVNARA)

We are proud to announce a significant milestone in the journey of TMC Mineral Resources Pvt. Ltd. — our company has been awarded the Rajgamar Dipside (Deavnara) Underground Coal Mine, located in Korba, Chhattisgarh, under the 12th round of commercial coal block auctions conducted by the Ministry of Coal, Government of India.

The block was allocated under the Coal Mines (Special Provisions) Act, 2015, and forms part of the Ministry's efforts to drive transparency and private sector participation in India's coal sector.

This is not just a project — it marks TMC Group's first-ever coal block allocation, and a bold step forward into the heart of India's energy and natural resources sector.

Reward & Recognition

Sanjay Kumar Patel

We are delighted to recognize our employees from Shahpur for successfully clearing the Electrical Supervisory Certification Exam. To celebrate their achievement, each of them was felicitated with a reward of ₹50,000, acknowledging their dedication, perseverance, and excellence.

Noteworthy Initiatives

A special training program was organized at GVTC, Pandovpara, for MTs and DETs from the Jhilimili site. The program focused on enhancing their technical knowledge, operational skills

An ITI Apprenticeship Entrance Exam was conducted at the Jhilimili site, providing aspiring candidates with an opportunity to qualify for hands-on training and skill development in the mining sector.

We're bringing knowledge directly to the workplace! Through tailored, site-specific training sessions, we address individual challenges, strengthen operational practices, and uplift overall performance. **With a combined 3266 man-hours of learning**, our teams are setting new benchmarks—enhancing skills, improving efficiency, and raising standards at every site, every single day.

Top Trainer

Mr. Prakash Pradhan - 05
Sial Ghogri

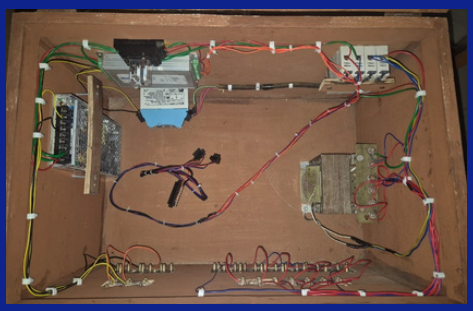

Mr. Ankush Gupta - 05
Jhilimili

Cheers to our Trainer of the Month! Your ability to turn learning into action has transformed not just skills, but mindsets. You're not only teaching—you're igniting confidence, building capability, and shaping a stronger tomorrow.

Kaizen Of The Month

To improve the safety and efficiency of IGBT and Chassis testing, our Churcha team developed an in-house test bench as part of a Kaizen initiative. Earlier, there was no dedicated setup, and testing was time-consuming, risky, and often led to IGBT damage or motor failure. With the new setup, we designed a test bench that provides multi-voltage AC/DC outputs, supports remote-controlled safe testing, and eliminates dependency on external resources

- Cuts testing time, lowers damage risk
- 100% accurate fault detection
- Multi-voltage support for better testing
- Future MCU testing capability
